Some Things to Consider:

- 1 Ann does have the option of using public transit (bus) to get to work. But the bus costs money, and also adds time to her commute which impacts her being home with her children.
- 2 Ann's daughter gets invited to birthday parties. When this happens does she buy a present? Tell her daughter that she can't go? Send her without a present?
- 3 Internet may seem like a luxury, but without it, how would the kids access information they need for homework?
